

DIY SEED PLANTER

(USING TOILET PAPER TUBES!)

Materials

- Toilet paper rolls
- Scissors
- Soil
- Seeds
- Tray to hold seed starter pots

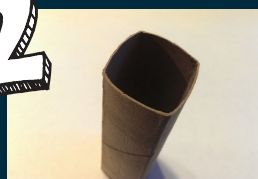

Instructions

- Fold the roll in half one way. Then, fold it in half the other way.
 - Make sure the creases from the last fold line up and you have a square!
- Fold the roll in half again (following the creases you made already) and make a 3/4 inch cut in the center. Then fold the roll in half again other way and make another 3/4 inch cut in the center.
 - You should have 4 cuts in total on the bottom of your roll.
- Fold the cut area on the bottom like you would close a box.
- Fill your new seed pots with soil, plant your seeds, and water. Once you have seedlings - you can plant directly into the ground!
